Keio University established **India Japan Laboratory (IJL)** in its **Shonan Fujisawa Campus** in 2019 to foster bilateral collaboration on education, research and innovation between India and Japan. Over last three years, the laboratory has been proactively engaging students, young professionals, researchers, innovators from both the countries through online and face to face activities. More details can be found in: www.indiajapanlab.org.

In 2022, India and Japan are celebrating 70 years of diplomatic relations between the two countries. To commemorate this, we organize India Japan Forum with specific emphasis on

- 1) bilateral relations
- 2) technology, economy, and business
- 3) culture, youth and development perspectives

The primary target groups of the forum will be students, young professionals, practitioners and youth groups from both the countries. The online version will be open to wider audience based on their diverse interest areas.

- The Yoga Organization of Japan

Mission

India Japan Laboratory (IJL) will engage students and faculty members in inter-disciplinary and multi-stakeholder (private sector, non-government organizations and citizens) education, action research and policy advocacy programs on issues relevant to India and Japan. Through collective co-learning from India, IJL aims to co-design innovative solutions with governments, private sector, citizen groups and other related stakeholders. It provides unique learning opportunities for Keio students as well as students from different universities and research institutions from India and the world.

Key Goals

With the existing inter-disciplinary nature of education and research in the Shonan Fujisawa Campus (SFC) of Keio University, the IJL would have the following goals:

- Conduct India Studies Course in SFC
- Facilitate, engage and support faculty and student exchange programs with India, including internship opportunities in universities, private sector, start-ups
- Engage public figures from India and Japan to deliver lectures and seminars
- Share knowledge and expertise from India, Japan and globally
- Develop a Community of Knowledge and Practice through action-based learning
